Configuration

Project-specific

Model & configuration

Selection item	Catalog reference / information to confirm
Workstation dimensions	Configuration-specific; confirm during selection
Assembly requirements	Share your process, components and production objectives
Equipment interfaces	Review as part of the proposed line layout

The brochure describes antistatic work surfaces. Confirm grounding, workstation dimensions, tools, utilities and the complete configuration.

Application fit

Assembly workstations / Production support / Integrated assembly lines

Before requesting a configuration

Share the workpiece and tooling weight, machine model, available space, target cycle and equipment interfaces. Final selection and delivery scope require project-specific confirmation.
