FLEXIBILITY IN EVERY AXIS

Six-axis industrial robots

Articulated industrial robots with a choice of payload and reach, ready to be evaluated around your handling and automation requirements.

PRODUCT ILLUSTRATION

Payload

10-50 kg

Reach

1,580-2,400 mm

Controlled axes

6 axes

Model & configuration

Model	Payload	Reach	Repeatability
KS-610	10 kg	1,580 mm	±0.05 mm
KS-620	20 kg	1,850 mm	±0.05 mm
KS-630	30 kg	2,100 mm	±0.08 mm
KS-650	50 kg	2,400 mm	±0.10 mm

Payload includes the handled workpiece and complete end tooling. Confirm usable workspace, installation, motion sequence and required interfaces for the application.

Application fit

Part handling / Production automation / Application-specific robot integration

Before requesting a configuration

Share the workpiece and tooling weight, machine model, available space, target cycle and equipment interfaces. Final selection and delivery scope require project-specific confirmation.
